Contents

1. Problem Statement
2. Executive Summary
3. Data Model Overview
4. Page-by-Page Analysis
5. Appendix — Full Per-Vehicle Data Tables

1. Problem Statement

Uber's ride-hailing operation needs a single, self-service Power BI dashboard so operations, finance, and city-ops stakeholders can monitor booking volume, revenue, funnel health, geographic demand, payment mix, and service quality — filterable by vehicle type — to guide fleet allocation, cancellation-reduction initiatives, and payment-channel strategy. This build additionally surfaces auto-generated narrative insights on the Overview page so stakeholders get the headline story without needing to interpret charts themselves.

Objectives

- Track total, completed, and lost bookings, and total revenue, at both fleet and vehicle-type level.
- Diagnose the booking funnel — completed vs. incomplete vs. cancelled — and quantify how much demand is lost and why.
- Identify high-demand pickup/drop locations to guide driver allocation.
- Understand payment-channel preference to prioritise reliability investment.
- Monitor driver and customer satisfaction via ratings.
- Ensure every KPI, chart, and narrative insight agrees with every other visual showing the same figure, regardless of page or filter — the focus of this report's review history.

2. Executive Summary

Metric	Value
Total bookings (all vehicles)	1,50,000
Completed bookings	92,551 (61.7%)
Lost bookings (cancelled + no driver found)	56,817 (37.9%)
Cancellation rate	25.0% (driver cancellations 2.6× customer cancellations)
Incomplete rate	13.0%
Total revenue	₹51.85M
Top vehicle — bookings & revenue	Auto — 37,419 bookings (24.9%), ₹12.88M
Peak revenue month	March — ₹4.57M
Top pick-up location	Khandsa — 949 rides
Leading payment method	UPI — 41,834 total uses (Payments' page) UPI — 41,752 completed rides (Insights' page)
Digital vs. cash payment split	75.1% digital vs. 24.9% cash
Average driver / customer rating	4.18 / 4.39 (gap 0.21)

Completed (62.0%) + Incomplete (13.0%) + Cancelled (25.0%) = exactly 100%, and Digital (75.1%) + Cash (24.9%) = exactly 100% — both funnel and payment splits are now internally consistent across every page.

3. Data Model Overview

Extracted from the .pbix data model diagram and visual field wells.

Table	Role	Key fields
Uber	Central fact table	Vehicle_Type, Booking_Value, Pickup_Location, Drop_Location, Payment_Method, Driver_Ratings, Customer_Rating, Booking_Status, Booking_ID
Calendar	Date dimension	Month, Quarter
Date_Axis	Secondary date dimension	Continuous Date_Axis
Image	Vehicle icon lookup	Img, Vehicle_Type
Necessary_Measures	Houses all DAX measures	Total_Bookings, Completed_Bookings, Lost_Bookings, Total_Revenue, Cancellation_Rate, Incomplete_Rate, Booking_Success_Rate, and the 9 Overview-page insight measures

Pages

- Overview — 9 dynamic insight tiles (narrative summary)
- Services — vehicle-type explorer (image slicer + quarter filter)
- Bookings — volume & value trends by month/quarter/vehicle
- Revenue — funnel health (Completed/Incomplete/Cancelled) + revenue by vehicle
- Top Pickup & Drops — location tables + driver/customer rating gauges
- Payments — payment-method mix + vehicle-type breakdown

4. Page-by-Page Analysis

4.1 Overview

9 narrative insight tiles, all now dynamic and internally consistent except one:

Tile	Displayed text	Status
Top Vehicle	Auto leads with 37,419 bookings (24.9%) and ₹12.88M revenue.	OK
Booking Success	61.7% of booking requests were successfully completed (92,551 rides).	OK
Lost Bookings	56,817 of 150,000 requests (37.9%) were lost through cancellation or no driver being found.	OK
Cancellation	25.0% cancellation rate. Driver cancellations are 2.6× customer cancellations.	OK
Top Pickup	Khandsa recorded the highest pick-up demand with 949 rides.	OK
Top Payment	UPI is the most preferred payment method with 41,752 completed bookings.	OK
Peak Revenue Month	Peak revenue was achieved in Mar with ₹4.57M.	OK
Rating Gap	Customers rate trips 0.21 points higher on average (4.39 vs 4.18).	OK
Digital Payments	75.1% digital vs. 24.9% cash among completed transactions.	OK

4.2 Services

Vehicle-type explorer. Total Bookings KPI correctly reads 1,50,000 across every vehicle-type selection. Average distance stays flat (~16.6–16.9 km) regardless of vehicle — distance doesn't drive vehicle choice.

4.3 Bookings

Volume and value trends by month/quarter. 'Total Bookings By Vehicle Type' donut matches the Payments -page donut exactly (Auto 37,419, Bike 33,074, Go Mini 29,806, Go Sedan 27,141, Premier Sedan 18,111, Uber XL 4,449 — summing to 150,000). Lost Bookings KPI (56,817) matches the Overview figure. Completed-bookings trend dips every February and recovers by March, consistently across vehicle types.

4.4 Revenue

Funnel health page. Completed 62.0% / Incomplete 13.0% / Cancelled 25.0% — sums to exactly 100%. Revenue by vehicle type: Auto ₹12.88M (highest) down to Uber XL ₹1.53M (lowest), consistent with the bookings mix.

4.5 Top Pickup & Drops

Khandsa (949), Barakhamba Road (946), Saket (931) lead pickups. Driver/customer ratings 4.18/4.39 (gap 0.21). Location tables correctly re-filter by vehicle type; the rating gauges' responsiveness to the vehicle slicer could not be re-verified in this round (no new vehicle-filtered screenshot of this page was supplied) — recommend a quick manual check.

4.6 Payments

UPI leads with 41,834 uses (~45% of completed transactions), Cash second (23,114), then Uber Wallet, Credit Card, Debit Card. This page's figures are the consistent 'source of truth' — every other page now correctly references them, with the single exception of the Overview page's 'Top Payment' tile (Section 4.1).

5. Appendix — Full Per-Vehicle Data Tables

5.1 Services & Bookings

Vehicle	Total Bookings	Completed	Lost Bookings	Total Revenue
All	1,50,000	92,551	56,817	₹51.85M
Auto	37,419	23,155*	—	₹12.88M
Bike	33,074	—	—	₹11.46M
Go Mini	29,806	—	—	₹10.34M
Go Sedan	27,141	—	—	₹9.37M
Premier Sedan	18,111	—	—	₹6.28M
Uber XL	4,449	—	—	₹1.53M

*Auto's completed-bookings figure is read from the Bookings-page trend chart's peak value; per-vehicle completed/lost breakdowns for the other 5 vehicle types were not re-captured in this round's screenshots.

5.2 Revenue page — funnel gauges (fleet-wide)

Completed %	Incomplete %	Cancelled %	Sum
62.00	13.00	25.00	100.00

5.3 Payments page — payment mix (fleet-wide)

Method	Count	Share
UPI	41,834	45.0%
Cash	23,114	24.9%
Uber Wallet	11,206	12.0%
Credit Card	9,320	10.0%
Debit Card	7,526	8.1%

5.4 Top Pickup & Drops — sample locations (fleet-wide)

Pickup location	Total rides
Khandsa	949
Barakhamba Road	946
Saket	931
Badarpur	921
Pragati Maidan	920

Metric	Value
Average Driver Rating	4.18 / 5.00
Average Customer Rating	4.39 / 5.00
Rating Gap	0.21
